

Talking about a complex work

You are only allowed to use a slip of keywords !
(single words, groups of words, blackboard, transparencies, power point, handout)

No sentences or short texts !!!

You'll have to talk about how you made it !

First- give a preview of what you want to talk about !

(I want to talk about ... today. First I'll speak about .../ Then I'll tell you something about .../ Last I'll talk to you about ...)

Helpful tips: You can set up your talk tis way:

1. First steps

Here you can tell your listeners about:

When did you do it?

What subject / lesson?

What was your task ?

Working time ?

Resources ? Aid ? (Help?)

Kind of work ? (alone, group work)

2. How I did it

Here you should tell the audience about:

Working steps ?

(I started with.../ Then I .../ After that I .../ After finishing that I .../

Next I .../ Last I ...)

Problems ?

(pictures, headlines, drawing, font, scissors, glue, not the perfect pen, arranging pics and texts on the piece of paper, mistakes, finding information, no or not enough help from a partner, no idea for illustrating ...)

3. Results

At the end of your talk you talk to the audience about:

What was the aim of my work ?

(presentation, collecting/ giving someone information, illustrating, ...)

Audience ?

(classmates, other pupils, teachers, parents ...)

Feelings ?

(being excited, nervous,...)

When/where?

Grading ?

(the mark you/your group got for your work)

Your point of view ?

(interesting or boring job ?, fun or not ?, teachings for next job ?, pleased or not ? ...)
