

1. Bilde die Tauschaufgaben.

$6 \cdot 5 = \square$ $\square \cdot \square = \square$	$5 \cdot 4 = \square$ $\square \cdot \square = \square$	$4 \cdot 7 = \square$ $\square \cdot \square = \square$	$5 \cdot 6 = \square$ $\square \cdot \square = \square$
$2 \cdot 4 = \square$ $\square \cdot \square = \square$	$7 \cdot 4 = \square$ $\square \cdot \square = \square$	$9 \cdot 6 = \square$ $\square \cdot \square = \square$	$5 \cdot 8 = \square$ $\square \cdot \square = \square$
$3 \cdot 2 = \square$ $\square \cdot \square = \square$	$3 \cdot 5 = \square$ $\square \cdot \square = \square$	$8 \cdot 6 = \square$ $\square \cdot \square = \square$	$7 \cdot 3 = \square$ $\square \cdot \square = \square$

2. Was fällt dir auf?

$4 \cdot 5 = \square$	$10 \cdot 7 = \square$	$8 \cdot 6 = \square$	$10 \cdot 3 = \square$
$2 \cdot 5 = \square$	$5 \cdot 7 = \square$	$4 \cdot 6 = \square$	$5 \cdot 3 = \square$
$4 \cdot 8 = \square$	$6 \cdot 4 = \square$	$2 \cdot 2 = \square$	$5 \cdot 8 = \square$
$8 \cdot 8 = \square$	$3 \cdot 4 = \square$	$4 \cdot 2 = \square$	$10 \cdot 8 = \square$

3. Umkehraufgaben

$48 : 8 = \square$, denn $6 \cdot 8 = 48$	$48 : 6 = \square$, denn $8 \cdot 6 = 48$
$45 : 9 = \square$, denn $5 \cdot 9 = 45$	$24 : 6 = \square$, denn $4 \cdot 6 = 24$
$63 : 9 = \square$, denn $7 \cdot 9 = 63$	$18 : 3 = \square$, denn $6 \cdot 3 = 18$
$45 : 9 = \square$, denn $5 \cdot 9 = 45$	$24 : 3 = \square$, denn $8 \cdot 3 = 24$
$27 : 3 = \square$, denn $9 \cdot 3 = 27$	$21 : 7 = \square$, denn $3 \cdot 7 = 21$

4. Rechnen mit Variablen

$7 \cdot a = 63$ $a = \square$	$9 \cdot b = 81$ $b = \square$	$8 \cdot c = 72$ $c = \square$	$3 \cdot d = 27$ $d = \square$	$3 \cdot e = 27$ $e = \square$
$f \cdot 9 = 81$ $f = \square$	$h \cdot 7 = 63$ $h = \square$	$i \cdot 3 = 27$ $i = \square$	$k \cdot 6 = 54$ $k = \square$	$m \cdot 3 = 27$ $m = \square$
$18 : n = 6$ $n = \square$	$18 : p = 6$ $p = \square$	$18 : q = 6$ $q = \square$	$18 : r = 6$ $r = \square$	$18 : s = 6$ $s = \square$
$t : 8 = 3$ $t = \square$	$u : 7 = 3$ $u = \square$	$v : 5 = 8$ $v = \square$	$w : 7 = 4$ $w = \square$	$x : 7 = 3$ $x = \square$
